

Goal in Life

I'm a tech enthusiast who has the dream to explore the very limits of Machine Learning and Artificial Intelligence and achieve something great for the society at large through my ideas. I also want to promote freelance developers and support them and their talents at extremely low or no costs.

Additional Information

Soft Skills

I'm extremely adaptive, hardworking and can assume the roles of both a team leader as well as a team player if and when required. I always give my very best to whatever task I'm assigned. I have a knack for aptitude and it has proved to be extremely useful at critical times.

My *GitHub Profile*

The profile has all my completed projects stored in public repositories and can be viewed by anyone.

My *LinkedIn Profile*

The profile has all other professional related works of mine.

My *Resume Website*

One may have a look at my entire academic and professional background along with my entire list of certifications on the website linked above.
